International Fair of Racing Pigeons
EXPOpigeons
29-31 of January 2010

The exhibitors from two previous editions of International Fair of Racing Pigeons have declared their presence during the next edition of this superb and popular event.

The last EXPOpigeons Fair (January 2009) in Expo Silesia attracted more than 20 thousand visitors, who had the possibility to admire 1200 most beautiful birds from six European countries: Poland, Belgium, Netherlands, Germany, Ukraine and Norway.

The third edition of the Fair will be held simultaneously with European Exhibition of Racing Pigeons, during which the most beautiful pigeons from all European countries will be presented.

It is going to be a big festival of both admirers and pigeon breeders! Therefore we invite you to participate in this event, which is continually developing and expanding, both in respect of number of exhibitors and visitors. We are waiting for your application.

The exhibitors' views on the second edition of EXPOpigeons Fair:
Slawomir Pniewski, veterinary surgeon and „ZOOWET” company owner:

I represent „ZOOWET”, a company directly related to veterinary services which is a participant of all respected exhibitions and trade fairs of racing pigeons and decorative poultry in country and abroad. With full responsibility I confirm that the Exhibition of Racing pigeons in EXPO Silesia exhibition centre is an indisputable country leader. The level of organization was very high and definitely outclassed the other events of this type. The large number of exhibitors and impressive amount of visitors – interested breeders – gave exceptional promotion opportunities for companies and products offered by the companies. It was a great festival for everybody related to the breeders' hobby(...) Generally speaking, my opinion and the opinions of other friendly companies is very positive. We are all waiting for the next fair in Expo Silesia exhibition centre in 2010 and we expect equally perfect organization, good atmosphere and maybe even more visitors and guests.

Cezary Wójtowicz

The EXPOpigeons 2009 Fair was the first fair during which my company was present as an exhibitor and I consider this debut as very successful. The stand was made in accordance to the project created with the organizer of this fair. During the fair we had decided to equip our stand with a glass case which was immediately delivered to the stand. The glass case turned out to be a „bang on” for our equipment exhibition. The organizer's flexibility is incredible when we take the amount of visitors into consideration. The number and support of security services was highly appreciated and gave the sense of safety and comfort.

Stanisław Czarny

Expo Silesia, the organizer of national exhibitions and ExpoPigeons Fair has surprised me. The exhibition pavilion is characterized by good lighting and ventilation systems. There is a separate car park for exhibitors from which they can easily transport their goods to the stands. The separate entrance does not interfere with the entrance for visitors. This is a huge national event with visitors and breeders coming from Poland, neighbouring European countries, Russia and China. I'm planning to present my pigeons during the Olympics of Central European Countries which will take place next year in Expo Silesia.

Dariusz Chelchowski „Avistar”

Summarizing the exhibition season I am absolutely sure that the Fair in Sosnowiec was the most successful in comparison to other fairs and exhibitions in Poland and abroad. Professionally prepared exhibition pavilion, infrastructure, competent and helpful staff are the factors influencing positive opinions. The marketing assistance and media coverage resulted in large number of visitors.
